## PROFILE

---

Generative AI and Machine Learning enthusiast with practical experience developing LLM-powered applications, including Medical RAG Chatbots and Multi-Agent AI systems. Proficient in Python, LangChain, vector search, prompt engineering, and AI workflow orchestration. Demonstrated ability to transform complex business requirements into scalable AI solutions that improve automation, knowledge retrieval, and operational efficiency.

## TECHNICAL SKILLS

---

**Languages:** Python, SQL, Java

**Generative AI:** LLMs, RAG, Prompt Engineering, AI Agents, Multi-Agent Systems.

**AI Frameworks & APIs:** LangChain, LangGraph, FastAPI, Flask.

**LLMOps & DevOps:** Jenkins, SonarQube, Trivy, CI/CD Pipelines.

**Cloud & Infrastructure:** AWS, AWS ECS, Docker.

**Vector Databases & Retrieval:** FAISS, Embedding Models, Semantic Search.

## PROJECTS

---

**Medical RAG Chatbot**  | [LangChain](#), [FAISS](#), [Trivy](#), [Flask](#), [Jenkins](#), [AWS](#).

- Engineered a Retrieval-Augmented Generation(RAG) system for context-aware medical information retrieval.
- Developed semantic retrieval with document chunking, embeddings, and vector search.
- Integrated LangChain pipelines to generate grounded responses and minimize hallucinations.
- Implemented Jenkins CI/CD and deployed a scalable cloud-ready AI application on AWS.

**Multi AI Agent System**  | [LangChain](#), [LangGraph](#), [FastAPI](#), [Jenkins](#), [SonarQube](#), [AWS ECS](#)

- Engineered a multi-agent AI system with specialized agents for autonomous task execution.
- Developed agent orchestration workflows using LangGraph for multi-step reasoning and collaboration.
- Integrated FastAPI services to enable scalable communication between agents and external tools.
- Implemented CI/CD pipelines with Jenkins and deployed containerized services on AWS ECS.

**Speech Emotion Detector**  | [TensorFlow](#), [Librosa](#), [MFCC](#), [Flask](#), [Deep Learning](#)

- Developed an emotion recognition system using speech signals and audio feature extraction techniques.
- Processed audio data using MFCC features to improve emotion classification performance.
- Trained and evaluated machine learning/deep learning models for multi-class emotion detection.
- Integrated a user-friendly interface for real-time speech emotion prediction and analysis.

## CERTIFICATIONS

---

- AWS Certified Cloud Practitioner
- Microsoft Fabric Analytics Engineer Associate
- API Fundamentals Student Expert - Postman
- Career Essentials in Generative AI - Microsoft & LinkedIn
- McKinsey Forward Program Learner

## EDUCATION

---

**Vellore Institute of Technology, Bhopal**

*B.Tech Computer Science and Engineering - CGPA - 8.09*

**2022 – 2026**

*Bhopal, Madhya Pradesh*

## EXTRACURRICULAR

---

- \* Participated in a college hackathon, developing practical problem-solving and teamwork skills. 
- \* Taught basic web development(front-end part) in offline Mode.
- \* NSS Member from 2022 to 2023.
