PROFILE

Data Analyst & Machine Learning enthusiast skilled in Python, SQL, and BI tools, with experience developing predictive models and interactive dashboards to solve real-world problems. Proven ability to analyze healthcare, retail, and financial datasets, uncover high-impact insights, and build data-driven solutions that enhance operational efficiency and strategic decision-making.

TECHNICAL SKILLS

Programming & Libraries: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn), SQL.

Data Analysis & Machine Learning: Data Cleaning, Feature Engineering, Exploratory Data Analysis, Statistical Analysis, Predictive Modeling, Model Evaluation.

Visualization & BI Tools: Power BI, Tableau, Microsoft Excel (Pivot Tables, Power Query, Charts).

Databases & Tools: MySQL, Oracle SQL, Jupyter Notebook, Google Colab.

PROJECTS

Healthcare Analytics: Stroke Risk Prediction [🔗](#) | Python, SQL, Power BI, Excel

- Built an end-to-end ML pipeline on patient health data, performing cleaning, encoding, and feature engineering for predictive modeling.
- Addressed severe class imbalance (**2% stroke cases**) and improved minority-class detection using **precision, recall, and F1-score** evaluation.
- Trained and compared multiple models, achieving up to **98% accuracy** and **0.96 weighted F1-score**.
- Identified key stroke risk factors enabling **early detection** and preventive healthcare decisions.

Financial Data Analytics Project [🔗](#) | Python, SQL, Tableau, Power BI, Excel

- Cleaned and processed loan application data to improve reporting accuracy and support risk evaluation.
- Analyzed borrower profiles, income, and credit factors to identify **high-risk default patterns**.
- Built KPI dashboards tracking loan performance, approval trends, and **repayment behavior insights**.
- Generated actionable insights enabling **risk-aware lending decisions** and portfolio monitoring.

Sales Data Analysis Capstone Project [🔗](#) | Python, SQL, Power BI, Excel

- Developed an end-to-end sales forecasting pipeline using data cleaning, encoding, and **feature engineering**.
- Engineered key predictors—outlet type, visibility, item category, and pricing to improve **forecast accuracy**.
- Trained and optimized regression models achieving **$R^2 + 0.85$** with reduced prediction error.
- Evaluated performance using **RMSE and R^2** to ensure reliable real-world forecasting.
- Identified revenue drivers enabling **demand forecasting, inventory optimization**, and strategic planning.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Fabric Analytics Engineer Associate
- Oracle Data Analytics Cloud Professional Certificate
- Cisco Data Analytics Essentials
- McKinsey Forward Program Learner

EDUCATION

Vellore Institute of Technology, Bhopal

B.Tech Computer Science and Engineering - **CGPA - 8.09**

2022 – 2026

Bhopal, Madhya Pradesh

EXTRACURRICULAR

- * Participated in a college hackathon, developing practical problem-solving and teamwork skills. [🔗](#)
- * Taught basic web development(front-end part) in offline Mode.
- * NSS Member from 2022 to 2023.
