PROFILE

Aspiring Business Analyst with strong analytical and problem-solving skills, experienced in translating complex data into actionable business insights. Proficient in requirement gathering, stakeholder management, and data-driven decision support to improve business performance. Skilled in identifying business needs, optimizing processes, and delivering insights through data analysis and visualization.

TECHNICAL SKILLS

Business & Analytical Skills: Requirement Gathering, Stakeholder Management, KPI Tracking, Business Process Analysis, Data Analysis (EDA), Decision Support.
Tools & Visualization: Power BI, Tableau, Excel (Pivot Tables, Power Query), Jira, Agile/Scrum Basics.
Programming & Data Handling: Python (Pandas, NumPy), SQL (MySQL, Oracle), Query Optimization.
Business Analysis Concepts: User Stories, Process Mapping, Gap Analysis, Workflow Documentation

PROJECTS

Healthcare Analytics: Stroke Risk Prediction [↗](#) | Python, SQL, Power BI, Excel

- Analyzed **patient health data** using **Excel (Pivot Tables, data cleaning)** and **SQL** to identify **key risk factors** and support **data-driven decisions**.
- Performed **data cleaning and exploratory analysis** to improve **data quality** and uncover **actionable insights**.
- Developed **interactive dashboards** in **Power BI** to track **critical health indicators and trends**.
- Presented insights to support **early intervention strategies** and improve **patient risk management**.

Financial Data Analytics Project [↗](#) | Python, SQL, Power BI, Excel

- Evaluated **financial data** using **Excel (Pivot Tables, data transformation)** and **SQL** to identify **revenue trends** and **risk patterns**.
- Conducted **variance and trend analysis** to support **budgeting and forecasting decisions**.
- Developed **interactive dashboards** in **Power BI** to monitor **portfolio performance** and key **financial KPIs**.
- Generated **actionable insights** and **automated reports** to support **financial planning** and **decision-making**.

Sales Data Analysis Capstone Project [↗](#) | Python, SQL, Power BI, Excel

- Examined **sales data** using **Excel (Pivot Tables)** and **SQL** to uncover **customer purchasing patterns**.
- Identified **top-performing products and regions** to support **sales strategy optimization**.
- Created **Power BI dashboards** to track **KPIs like revenue, growth, and customer segments**.
- Generated insights to enhance **inventory planning** and improve **overall sales performance**.

CERTIFICATIONS

- Cloud & Data: **AWS Certified Cloud Practitioner** – Amazon Web Services
- Analytics & BI: **Microsoft Fabric Analytics Engineer Associate** – Microsoft
- Data Analytics: **Oracle Data Analytics Cloud Professional** – Oracle
- Foundations: **Cisco Data Analytics Essentials** – Cisco
- Business Program: **Forward Program** – McKinsey & Company

EDUCATION

VIT Bhopal University

B.Tech - Computer Science and Engineering - **CGPA: 8.09**

2022 - 2026

Bijnor, Uttar Pradesh

EXTRACURRICULAR

- * Participated in a college hackathon, demonstrating problem-solving, teamwork, and analytical thinking. [↗](#)
- * Taught basic web development (front-end) in offline sessions, showcasing communication and mentoring skills.
- * Member of NSS (National Service Scheme) (2022–2023), contributing to team collaboration and community initiatives.
